

The preferred source for power, cooling, and monitoring solutions in the Intermountain West.

SERVICES

- UPS service agreements, preventive maintenance, and battery replacement services
- Load bank testing, commissioning, thermal imaging
- Product upgrades and reliability enhancements
- Battery capacity testing
- Switchgear maintenance

POWER QUALITY & POWER DISTRIBUTION

Uninterruptible Power Systems

- Three-phase units up to 1MW
- Single-phase units up to 30kVa
- Flywheel UPS systems and containerized solutions
- Engineered multi-module systems

Power Distribution Systems

- Track busway from 40A to 800A. AC and DC systems
- Wall mounted raceway from 40A to 60A
- Rack power distribution units single & three-phase
- Floor based PDU's with harmonic filtering
- Single and three-phase static transfer switches

Switchgear Systems

- Custom electrical distribution systems
- Retrofits and upgrade services for existing switchgear
- UPS bypass panels, UPS/generator paralleling gear, DC disconnects
- Analog-to-digital upgrades

Additional Products

- DC power systems
- Power & sag ride-thru conditioners, harmonic filtering
- Micro-modular data centers

PRECISION AND PORTABLE COOLING

- Precision cooling, room-based and row-based. Containment solutions for raised floor and non-raised floor environments
- Portable cooling rental and sales. Cost effective solutions for applications from spot cooling to facility-wide cooling
- Hot and cold aisle containment solutions
- Rear door heat exchanger solutions

MONITORING

- 24/7 continuous thermal monitoring for critical electrical gear providing early stage detection of heat related issues in bus joints and cabling
- Data Center Infrastructure Management (DCiM) from rack to enterprise wide solutions
- Battery monitoring systems: wired and wireless
- Branch circuit monitoring
